How Power Play works

As part of the Powerball drawing, a Power Play multiplier will be randomly drawn. If you win a cash prize on Powerball (\$4–\$50,000) and have added Power Play (for an additional \$1), your cash prize will be multiplied by the Power Play multiplier number drawn (2x, 3x, 4x, 5x or 10x). Also, when you add Power Play and match 5 white balls, you will win \$2 Million!

Cash or annuity?

If you win a Powerball jackpot, you are able to choose between a one-time cash payment or receiving 30 annual installments. This choice can be made when you come to the Lottery office to claim your prize.
